5-AF-CW

CHEESE & DAIRY PORTIONING

This industrial cheese portioning machine uses a stainless steel blade to cut semi-hard and hard cheese wheels into wedges. This unit is different from the 5-AF because it incorporates FoodTools proven guillotine cutting technology powered with a pneumatic actuator to slice hard cheeses. Wheels are supported in a custom fit product holder and proprietary functions insure correct positioning and consistently uniform portions. The machine is completely wash down ready and built to endure a high production facility.

SPEED

Up To 60 Wheels Per Hour
