## SHEET PORTIONING

This inline sheet cake cutting machine features 1 slicing station for inline portioning of sheet products. It includes a servo driven conveyor, multiple axis cutting head, automatic onload and offload options by hand or by optional automated load conveyor. The product moves into the cutting area and is portioned by one mechanical cutting station. The cut pattern is chosen from the touch screen operator interface. After the cut pattern cycle the product is then conveyed out the back side of the machine to an optional off loading conveyor.
