ACCUSLICE-100PC-1A

PIZZA PORTIONING

This pizza and lasagna cutting machine is designed to slice pizza, lasagna, or quesadilla at high speed. The model features a single product lane and can be customized to cut round, rectangle, or square products. Change over between products is quick and easy and all components can be easily sanitized. A conveyor system allows the machine to be included in an inline, automated production process. The product is loaded on to the conveyor either automatically or by hand, sliced in the middle, and then offloaded for packaging. This machine is great for any production facility cutting a large quantity of frozen pizza, lasagna, or quesadilla products.

SPEED

Up To 1,500 Products Per Hour, 1 Product Per Cycle
