ACCUSLICE-200HS

SHEET PORTIONING

This high speed inline slicing machine is built to cut half sheet bakery products. The model uses a conveyor surface or in the box/pan holders to cut sheet products into individual portions. The 200 series features 2 cutting stations to increase production speed. The first cutting station slices the x axis and the product is indexed to the second station to cut the y axis. Bakeries slicing more than 2 half sheets per minute find this machine valuable.
