ACCUSLICE-200RF

ROUND PORTIONING

This high production cake cutting machine features two slicing stations with manual product loading. This model includes the option to cut cakes and place Divider Inserts between the slices using roll stock Divider Inserts. Touch screen operation allows one operator to attain cutting speeds up to 20 cakes per minute depending on the portion size. The machine has quick-change product holders and can cut various cake diameters. The conveyor is servo-driven for accurate positioning and servo driven blades and automatic off-load accessories can be added as options. This machine is best for a high production facility slicing more than 400 cakes per hour.

SPEED

Up To 425 Products Per Hour
