ACCUSONIC-100FS

SHEET PORTIONING

This ultrasonic cake slicer features one cutting station for inline slicing of fresh sheet or round cake products. The machine features a servo driven conveyor, multiple axis cutting head, automatic onload and offload options and is built to cut round cakes into wedge slices or full sheet cakes into squares, rectangles, triangles, diamonds, parallelograms, hexagons, and other shapes. The ultrasonic blade allows a facility to cut fresh and delicate bakery products fresh and eliminates the wasted time and cost of freezing the products before portioning.
