ROUND PORTIONING

This industrial cake slicer is capable of cutting a variety of frozen round products including cheesecakes, layer cakes, ice cream cakes, pies, and more. The machine features fully automatic product positioning, indexing, and Divider Insert feeding. A single operator can double production speed by using two machines simultaneously, unloading and loading one machine while the other machine is cutting a cake. Portions will all be a consistent size no matter who is operating the machine. A simple switch can change from cutting with Divider Inserts to cutting without. This machine is best for bakeries producing 200 or more products per hour.

SPEED

Up To 350 Products Per Hour

PROUDUCT TYPE

Round

PRODUCT TEMPERATURE

Frozen, Chilled, Hard

END USER

Medium Size Bakeries

PORTIONING TECHNOLOGY
