HORIZONTAL LAYER PORTIONING

This layer cake cutting machine is built to precisely and efficiently cut products into horizontal slabs for a layer cake production line. Slice off the top of a cake for an evenly cut professional look. Increase production and lower costs by baking one cake and slab cutting it into several thin layers for a layer cake. This machine uses 3 horizontal reciprocating Teflon-coated blades to cut consistent layers from 0.3" to 3.5" thick. This machine is great for a bakery producing layer cakes or slicing the top crown off of cake products.
