TS-1

TORTILLA STRIP PORTIONING

This tortilla strip cutter is an economical unit used to quickly slice tortillas into strips. Tortillas are loaded into the gravity fed machine via the ramp at the top and stainless steel roller cutters slice the strips. The sliced product can drop into a box, tray, bag, or onto a conveyor. One operator can manually load the product while the sliced strips are automatically offloaded and dropped onto a conveyor for the production process. This is a great machine for any tortilla or pita production line needing to cut up to 38,000 tortillas per shift.

SPEED

Up To 80 Tortillas Per Minute

PROUDUCT TYPE

Tortilla Rounds

PRODUCT TEMPERATURE

n/a

END USER

Tortilla Strip Producers

PORTIONING TECHNOLOGY

Stainless Steel Rollers
